### **DETAILED ACTION**

1. This office action is in response to the request for continued examination filed on 04/07/2008.
2. Claims 1-12 are pending in the application and have been examined.

### ***Allowable Subject Matter***

3. Claims 1-12 are allowed. Independent claims 1 and 7 recite subject matter not taught by the closest prior art. More specifically, claims 1 and 7 recite a unique technique for preventing a differential power analysis attack by forcing a register write to cause the same number of high-to-low bit transitions as low-to-high bit transitions in a total of at least four registers. This technique, in combination with the rest of the claims, is not taught or made obvious by the prior art. The claims are therefore allowable.
